

HHS : HAIL HANDLING SERVICES

HHS : a gate

Be the benchmark in mass disaster management in
PDR (Paintless Dent Removal)...

... for dedicated professional services

HHS : its strengths

Since its creation (March 2020), the company has shown very positive results:

- Export : the company is increasing its capacity for intervention abroad and is setting up physically in three new countries.
- Volume: several tens of thousands of vehicles repaired and delivered since its creation
- Workforce : mobile, our administrative and technical teams manage the various missions entrusted to us.

The deployment of teams is a strength that allows technicians, managers and administrative services to be moved to sites affected by climatic incidents in less than 48 hours. Thus HHS responds to crisis issues by providing precise analysis as well as and rapid and appropriate solutions.

Experience and networks

- With many years of experience in this business.
- Having a real business culture, providing an answer and solutions is essential.
- Ensuring operational control of files in a dematerialized manner. 24/7 online reporting
- Ensuring permanent quality control at each stage of the repair process.

International

- Suisse
- Spain
- Benelux / Germany
- South American / Australian
- USA / Canada

The registered office of the company is domiciled in France, close to Lyon.
HHS gives itself the means of its ambitions.

A space of 800 m² of offices and workshops are dedicated to train, certify its own PDR technicians and ensure the administrative management of all its subsidiaries.

The strong points

A team of salaried specialists, made up of technicians, managers and an administrative department, young and dynamic.

150 technicians
HHS partners, certified, with
significant experience capable of
intervening within 72 hours.

250 independent referenced
technicians, make it possible
to strengthen the teams
according to needs.

The global skills of HHS are subject to different specifications.
Independent organizations attest to good management and compliance with current manufacturer standards.

Our technicians are referenced and authorized to work on the entrusted vehicles. They integrate discreetly into production flows.

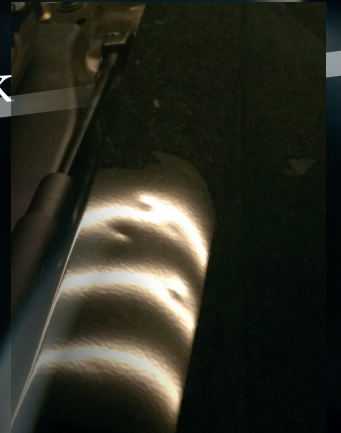

We can set up temporary workshops for the duration of the works (tents, rental of buildings, etc.).

A full Web interface allows you to follow the progress of the work flow, to edit a personalized report (accessible after obtaining a username and password) and to ensure a dematerialized final quality control (QR Code) .
